

TLink™ DATA MANAGEMENT SYSTEM

A data acquisition system so the perfusionist's primary focus is on the patient

TLink™ Data Management System is a data acquisition system that allows the perfusionist's primary focus to be on the patient. The TLink system incorporates all the functionality needed to implement a paperless system for perfusion records.

Customizable

TLink System's settings and features can be tailored to meet the specific requirements of different cases and different users, then saved and recalled as needed.

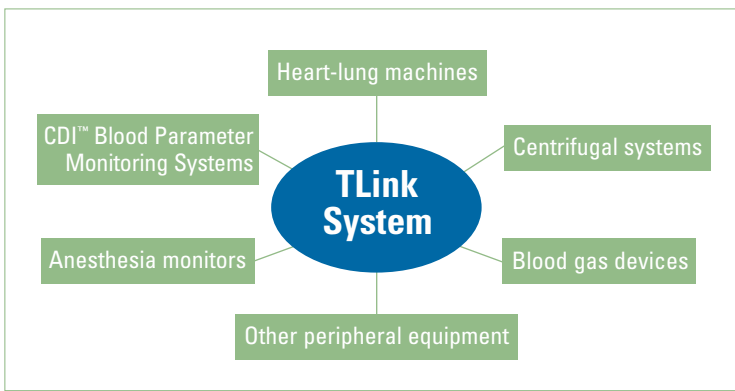

- Select the features you want to use.
- Select the data to collect, how often to collect it, and how to view it.
- Change the configuration as your practice changes.
- Manage the data to suit your requirements.
- Data entered from devices without user intervention.
- Customized screen layouts with unlimited pump record designs.
- User-selected security levels.
- Easily establish quality assurance attributes for continuous quality improvement (CQI) management.

Easy to use

- The intuitive interface, drop-down menus and function keys are easy to use for fast selection of events. One or two touches and it's done.
- Easy barcode scanning.
- Data is acquired quickly and accurately without manual intervention, so the perfusionist's primary focus is on the patient.

Connectivity – Automatic data acquisition

- Advanced connectivity to devices in the operating room environment. Contact Terumo Cardiovascular Systems for the most up-to-date list of devices that interface with the TLink System.

Built-in Query Manager

TLink System's query management is integrated into the system.

- Easy to learn and use.
- All data can be queried within the system.
- Enhanced open-ended query capabilities can optimize your analysis post case.
- A robust database stores data efficiently and provides easy manipulation of data whenever necessary.
- Search patient records for information relevant to studies.

Managing case data

Your data collection and storage is organized and accurate with the TLink System.

- Easily transfer cases to a hospital information system (HIS).
- Centralize all case data.
- Quick data transfer via wireless, CD, LAN or USB device.
- Query capabilities within the system.

Flexible reporting capability

TLink System uses a variety of reports, including:

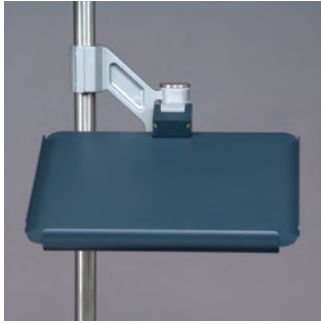

- Perfusion Case Report
- Clinical Activity
- Perfusion Checklist
- Quality Assurance
- Audit Summary Report
- Audit Detail Report

Dedicated Clinical Support

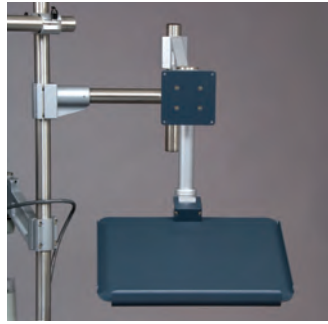

Terumo CVS Clinical Specialists are dedicated and focused on the needs of each customer. Terumo Clinical Specialists are trained as subject matter experts and available for onsite and remote support.

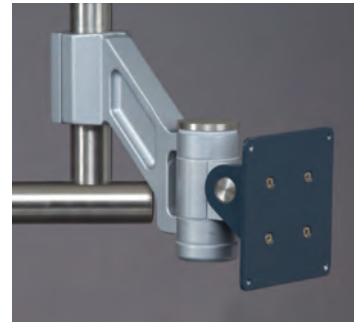

Bracket options provide greater flexibility

Notebook small tray bracket, 815689

Touch screen small tray bracket, 814806 and extension pole bracket, 814858

Touch screen mounting bracket, 814857

TLink Data Management System

Ordering Information

Description	Catalog No.
TLink Data Management System	
TLink Data Management System	814850
TLink Data Management software license	814871
Accessories	
TLink System touch screen computer	825184
Barcode scanner	814869
Touch screen mounting bracket	814857
Touch screen small tray bracket	814806
Touch screen large tray bracket	814855
Notebook large tray bracket	814856
Extension pole mount bracket	814858
Serial converter hub	814854
Single port serial converter	814808
Touch screen stylus	814870
Mini keyboard	814864

Minimum recommended hardware requirements

- Processor: Intel® Pentium® 4 Class
- Memory: 2GB
- Hard Disk Drive: 10 GB of available disk space
- Display: 1280 horizontal
- CD Drive: 24X CDR
- USB: 2 ports

TLink™ Data Management System
